2010 Catalog

RANGE-OPS

To safely and effectively monitor a gun range operation you must have a comfortable and functional observation tower. RANGE-OPS has based its Rangemaster Series Tower on its proven design for maximum operational performance and capabilities. Markets and applications served include private & public gun ranges, military and law enforcement ranges.

Rangemaster Series

- Any custom size required for operation or mission
- Electrical connections embedded in wall panels
- Large windows and work desk wired to support operation

Standard Features

What makes RANGE-OPS Rangemaster towers better than anything on the market? Check this feature list out and you'll see there really is no competition.

100% Aluminum insulated panel construction

- 2 1/4 inch foam insulation between two aluminum panels
- No wood, no rust, no rot
- Seal tight construction means no insects, no wasps, no owls

Heavy gauge steel tower & staircase

- We use 3/16 inch thickness steel tubing on our towers
- Commercial quality staircase
- 8 inch wide step treads with non-skid coating
- Double handrails
- 3 foot long porch landing
- Large footprint prevents toppling

Full size locking door

- Aluminum insulated panel construction
- 30 inch x 72 inch dimensions
- Keyed lockset
- Weather-stripped

Standard Features Cont.

RANGE-OPS Feature list continued:

Work desk & carpeted floor

- Aluminum shelves and windows are installed at customer specified height
- Wall to wall shelves for plenty of work-space

Quality glass windows

- We have large windows that offer the greatest amount of visibility

Interior breaker box and wiring

- Standard wiring package includes breaker box with interior lighting, outlets, coax, phone, network and PA system wiring

Exterior lighting and PA speakers

- Lighting and loud speakers to communicate the firing line.

Available options

- We can customize the RANGE-OPS solution for clients specific needs

The Cost Effective Solution

RANGE-OPS is a very effective solution compared to traditional square foot construction. RANGE-OPS require no maintenance and can be relocated if necessary.

Staircase tower heights range from 2 to 20 foot
RANGE-OPS can be easily moved

Delivery & Setup Services

While RANGE-OPS is a manufacturing company, our roots are in the service business and taking care of our clients is our number one and only priority. We have traveled the country from Texas to Wisconsin to Mississippi delivering and setting up our products for our clients.

We are fully equipped to handle any type of delivery and setup job for our customers in the U.S.A.
